Sri Lanka Standard
METHOD OF TEST FOR PAINTS AND VARNISHES
PART 16: DETERMINATION OF FINENESS OF GRIND
(FIRST REVISION)

NATIONAL FOREWORD

This Sri Lanka Standard was approved by the Sectoral Committee on Chemical and Polymer Technology and authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2016-10-27.

This Sri Lanka Standard is the first revision of SLS 1256: Part 16 : 2005 Methods of test for the determination of fineness of grind of paints and varnishes. The International Standard ISO 1524 : 2013 which specifies a method for determining the fineness of grind has been accepted for adoption as **SLS 1256: Part 16 : 2016** considering the new developments in products and technology.

This Sri Lanka Standard is identical with ISO 1524: 2013 Paints, varnishes and printing inks – Determination of fineness of grind published by the International Organization for Standardization (ISO).

TERMINOLOGY AND CONVENTIONS

The text of the International Standard has been accepted as suitable for publication, without deviation, as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka Standards. Attention is therefore drawn to the following:

- a) Wherever the words “International Standard” appear referring to a particular Standards they should be interpreted as “Sri Lanka Standard”.
- b) The comma has been used throughout as a decimal marker. In Sri Lanka Standards it is the current practice to use the full point at the base as the decimal marker.
- c) Wherever page numbers are quoted, they are ISO page numbers.
