Sri Lanka Standard
METHODS FOR DETERMINATION OF WIDTH AND
LENGTH OF TEXTILE FABRICS

NATIONAL FOREWORD

This standard was approved by the Sectoral Committee on Textiles, Clothing and Leather and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2008-12-19.

This Sri Lanka Standard is identical with ISO 22198 : 2006 Textiles – Fabrics – Determination of width and length. This standard supercedes SLS 45 : 1980 Method for measurement of length of woven fabric which was an adoption of ISO 3933 : 1976 and SLS 46 : 1980 Method for measurement of width of woven fabric which was an adoption of ISO 3932 : 1976.

ISO 3933:1976 and ISO 3932:1976 have been cancelled and replaced by ISO 22198:2006.

TERMINOLOGY AND CONVENTIONS

The text of the International Standard has been accepted as suitable for publication without deviation, as a Sri Lanka Standard. However certain terminology and conventions are not identical with those used in Sri Lanka Standards, attention is therefore drawn to the following :

- a) Wherever the words “International Standard/Publication” appear referring to this standard they should be interpreted as “ Sri Lanka Standard ”.
- b) The comma has been used throughout as a decimal marker. In Sri Lanka Standards it is the current practice to use a full point on the baseline as the decimal marker.
- c) Wherever page numbers are quoted, they are ISO page numbers.
