**SRI LANKA STANDARD
SPECIFICATION FOR NON-FOLDING
WHEELCHAIRS**

FOREWORD

This standard was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2003-12-19 after the draft, finalized by the Working Group on Wheelchairs, had been approved by the Sectoral Committee on Materials, Mechanical Systems and Manufacturing Engineering.

The type of wheelchairs covered by this specification is the non-folding type, which has found wider application in Sri Lanka compared to the other types. Non-folding wheelchairs can be robustly built making it suitable for both indoor and outdoor use and also for riding on relatively rough surfaces.

Guidelines for the determination of compliance of a lot with the requirements of this standard, based on statistical sampling and inspection is given in Appendix A.

Any alternative materials, designs, methods of assembly or products, which do not comply with the specific requirements of this standard, or are not mentioned in it, but which give equivalent results to those specified, may be acceptable.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or an analysis, shall be rounded off in accordance with **CS 102**. The number of significant figures to be retained in the rounded off value shall be the same as that of the specified value in this standard.

The assistance derived from the publication of the International Organization for Standardization (ISO) in the preparation of this standard is gratefully acknowledged.
