Sri Lanka Standard
GRAPHIC TECHNOLOGY - TEXT BOOKS AND PERIODICALS -
SIZES OF UNTRIMMED SHEETS AND TRIMMED PAGES

NATIONAL FOREWORD

This standard was approved by the Sectoral Committee on Information Technology on 1994-12-06 and was authorized for adoption and publication as a Sri Lanka standard by the Council of the Sri Lanka Standards Institution on 1995-11-23.

This Sri Lanka Standard is identical with ISO 6716, Graphic technology - Text-books and periodicals - Sizes of untrimmed sheets and trimmed pages, published by the International Organization for Standardization (ISO).

Terminology and conventions

The text of the International Standard has been accepted as suitable for publication, without deviation, as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka Standards, attention is therefore drawn to the following:

- a) Wherever the words 'International Standard' appear, referring to this standard they should be interpreted as 'Sri Lanka Standard'.
- b) Whenever page numbers are quoted, they are ISO page numbers.

Cross references

Corresponding Sri Lanka Standards for the following International Standards referred in the standard, are not available at present.

ISO 216, Writing paper and certain classes of printed mater - Trimmed sizes - A and B series.

ISO 217, Unprocessed writing and printing paper - Method of expression of dimensions and direction of manufacture.

ISO 478, Paper - Untrimmed stock sizes for the ISO-A Series - ISO primary range.

ISO 593, Paper - Untrimmed stock sizes for the ISO-A Series - ISO supplementary range.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6716 was developed by Technical Committee ISO/TC 130, *Graphic technology*, and was circulated to the member bodies in April 1982.

It has been approved by the member bodies of the following countries :

Australia	Egypt, Arab Rep. of	New Zealand
Austria	Finland	South Africa, Rep. of
Brazil	France	Sweden
China	India	USSR
Czechoslovakia	Italy	

The member body of the following country expressed disapproval of the document on technical grounds :

United Kingdom

Graphic technology — Text-books and periodicals — Sizes of untrimmed sheets and trimmed pages

1 Scope and field of application

This International Standard specifies sizes of untrimmed sheets and corresponding trimmed pages for text books and periodicals.

The sizes of paper used for the different steps of production, from printing machine untrimmed sheets to trimmed pages, have been compiled in table 3, showing their relationship.

3 Textbooks

The sheet sizes specified in table 1 are especially intended for text-books and other books for professional information but may also apply to other books.

Sizes and directions of manufacture of the paper are given in accordance with ISO 217.

The relationship between sizes of untrimmed sheets and pages and trimmed pages are given in table 3.

4 Periodicals

Table 2 specifies untrimmed sheet sizes for periodicals. The relationship between sizes of untrimmed sheets and pages and trimmed pages are given in table 3.

Table 1 — Text-books — Sheet sizes

Untrimmed sheet sizes cm	Number of pages	Nominal size of trimmed pages	
		Designation	Size * mm
100 M × 140	64		169 × 239
89 M × 124	64	A5	148 × 210
89 × 124 M	32	A4	210 × 297
88 M × 112	64		
86 M × 122	64	A5	148 × 210
86 × 122 M	32	A4	210 × 297
70 × 100 M	32		169 × 239

* Tolerances on trimmed sizes of paper (A and B series) are applicable.

5 Relationship between sizes

The relationship between sizes of sheet-fed printing machines and paper sizes, untrimmed and trimmed, used in the graphic industry for the production of text-books and periodicals, is illustrated in table 3.

Table 3 contains sizes from ISO 216, ISO 478, ISO 593 and ISO 3872, supplemented by a series of sizes related to the common sheet-fed, printing machine sizes of 102 cm × 142 cm,

71 cm × 102 cm, etc. (see table 3). An intended purpose of this series is to replace the B series when trimming of untrimmed sheets from printing machines of the sizes P142, P102, P71 and P51 is desired.

Some existing printing and book-binding machines and methods may require waste margins for trimming. Consequently the lowest deviation of the tolerances on trimmed sizes of paper have been retained for the determination of the acceptable minimum size of trimmed pages given in table 3.

Table 3 — Relationship between sizes
