SRI LANKA STANDARD METHODS OF TESTING FOR THE DETERMINATION OF THE DENSITY OF NON – CELLULAR PLASTICS PART 3: GAS PYKNOMETER METHOD

FOREWORD

This Sri Lanka Standard was approved by the Sectoral Committee on Chemical and Polymer Technology and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2006-10-25

This Standard is identical with ISO 1183-3: 1999 Plastics – Methods for determining the density of non cellular plastics Part 3: Gas pyknometer method published by the International Organization for Standardization.

The text of the International Standard has been accepted as suitable for publication, without deviation, as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka Standards. Attention is therefore drawn to the following:

Terminology and Conventions:

- a) Wherever the words 'International Standard' appear referring to a particular standard. They should be interpreted as "Sri Lanka Standard".
- b) The comma has been used throughout as a decimal marker. In Sri Lanka Standards it is the current practice to use the full point at the base as the decimal marker.
- c) Wherever page numbers are quoted, they are ISO/IEC page numbers.
