Sri Lanka Standard
SAMPLING LOCATION FOR CHEMICAL, PHYSICAL, MECHANICAL AND
FASTNESS TEST OF LEATHER
(Second Revision)

NATIONAL FOREWORD

This Sri Lanka Standard was approved by the Sectoral Committee on Leather and Leather products, and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2018-11-16

This Sri Lanka Standard is the second revision of **SLS 403: 2011** Sampling location for chemical, physical, mechanical and fastness test of leather. This International Standard **ISO 2418: 2017** which specifies the sampling location of leather for chemical, physical, mechanical and fastness tests has been accepted for adoption as **SLS 403: 2018** considering the accuracy of the tests done for leather in all above categories.

This Sri Lanka Standard is identical with **ISO 2418**, Leather – Chemical, physical, mechanical and fastness tests - Sampling location, published by the International Organization for Standardization (ISO)

TERMINOLOGY AND CONVENTIONS

The text of the International Standard has been accepted as suitable for publication without deviation, as a Sri Lanka Standard. However certain terminology and conventions are not identical with those used in Sri Lanka Standards. Attention is therefore drawn to the following:

- a) Wherever the words “International Standard” appear referring to this standard they should be interpreted as “Sri Lanka Standard”.
- b) Whenever page numbers are quoted, they are ISO page numbers.
