**SPECIFICATION FOR KNITTED VESTS**  
**PART 1 - KNITTED VESTS FOR MALES**  
**(First Revision)**

**FOREWORD**

This standard was approved by the Sectoral Committee on Textiles, Clothing and Leather and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 1996-08-15.

This standard consists of two parts. This part which covers knitted vests for males is the first revision of SLS 283 : 1974 ; Plain knitted gents' cotton vests. In this revision, the scope of the standard has been widened to include gents' and boys' vests made of cotton, regenerated cellulose (viscose) or synthetic blends and manufactured from all types of knitted constructions including plain knitted, interlock, rib and their modifications. The second part covers knitted vests for females.

This standard is based on the manufacturing practices followed in the country. The dimensions given in this standard are in SI units.

Guidelines for the determination of compliance of a lot with the requirements of this standard based on statistical sampling and inspection are given in Appendix A.

For the purpose of deciding whether a particular requirement of this specification is complied with the final value, observed or calculated, expressing the result of a test or an analysis shall be rounded off in accordance with CS 102. The number of significant places retained in the rounded off value shall be the same as that of the specified value in this specification.

In the preparation of this standard, the valuable assistance derived from the publications of the Bureau of Indian Standards is gratefully acknowledged.

**1 SCOPE**

1.1 This standard prescribes the requirements and methods of test for bleached or dyed knitted vests of round neck or V-neck with or without sleeves for males.

1.2 It does not specify the general appearance, feel, lustre, nor does it specify degree of whiteness of vests.
