**SRI LANKA STANDARD
SPECIFICATION FOR
WELDED WIRE FABRIC FOR GENERAL PURPOSES
(First Revision)**

FOREWORD

This standard was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2008.04.30 after the draft, finalized by the Working Group on welded wire fabric, had been approved by the Sectoral Committee on Engineering Materials, Mechanical Systems and Manufacturing Engineering.

This standard specifies requirements for materials, size of wire, manufacture of mesh, tolerances on mesh and sheet or roll and physical requirements for finished welded wire fabric and methods of test.

All values given in this specification are in SI units.

For the purpose of deciding whether a particular requirement of this standard is complied with the final value, observed or calculated, expressing the result of a test or an analysis shall be rounded off in accordance with **CS 102**. The number of significant places retained in the rounded off value shall be the same as that of the specified value in this standard.

In the preparation of this specification assistance derived from **IS 4948:2002** of the Bureau of Indian Standards is gratefully acknowledged.
