**NATIONAL FOREWORD**

This Sri Lanka Standard was approved by the Sectoral Committee on Textiles, Clothing and Leather and authorized for adoption and publication by the Council of the Sri Lanka Standards Institution on 2009-09-29.

This standard is identical with ISO 1833-16: 2006, Textiles- Quantitative chemical analysis- Part 16: Mixtures of polypropylene fibres and certain other fibres (method using xylene) published by International Organization for Standardization.

**TERMINOLOGY AND CONVENTIONS**

The text of the International Standard has been accepted as suitable for publication without deviation, as a Sri Lanka Standard. However certain terminology and conventions are not identical with those used in Sri Lanka Standards. Attention is therefore drawn to the following:

- a) Wherever the words ‘International Standard/publication’ appear referring to a particular standard, they should be interpreted as “Sri Lanka Standard”.
- b) The comma has been used throughout as a decimal marker. In Sri Lanka Standards it is the current practice to use the full point on the baseline as the decimal marker.
- c) Whenever page numbers are quoted, they are ISO page numbers.

INTERNATIONAL  
STANDARD
