Sri Lanka Standard
METHODS OF TEST FOR PAINTS AND VARNISHES
PART 41: DETERMINATION OF SETTLING

NATIONAL FOREWORD

This Standard was approved by the Sectoral Committee on Chemical and Polymer Technology and authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2019-10-22

The text of the International Standard ISO 21545: 2018 Paints and varnishes – Determination of settling has been accepted for adoption as a Sri Lanka Standard which specifies a method for determining the settling of coating materials. It is used to determine short-time settling.

This Standard is identical with ISO 21545: 2018 Paints and varnishes – Determination of settling, published by the International Organization for Standardization (ISO).

TERMINOLOGY AND CONVENTIONS

The text of the International Standard has been accepted as suitable for publication, without deviation, as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka Standards. Attention is therefore drawn to the following:

- a) Wherever the words “International Standard” appear referring to a particular Standard they should be interpreted as “Sri Lanka Standard”.
- b) The comma has been used throughout as a decimal marker. In Sri Lanka Standards it is the current practice to use the full point at the base as the decimal marker.
- c) Wherever page numbers are quoted, they are ISO page numbers.
