**Part 2 : DETERMINATION OF TOTAL MASS PER UNIT AREA, MASS PER
UNIT AREA OF COATING AND MASS PER UNIT AREA OF SUBSTRATE**

NATIONAL FOREWORD

This standard was approved by the Sectoral Committee on Textiles, Clothing and Leather and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2008-12-19.

This Sri Lanka Standard is identical with ISO 2286 – 2 : 1998 Rubber – or plastics – coated fabrics – Determination of roll characteristics Part 2 : Methods for determination of total mass per unit area, mass per unit area of coating and mass per unit area of substrate.

This standard supercedes SLS 761-1 Methods of test for rubber or plastic coated fabrics. Part 1 : 1986 Determination of roll characteristics of rubber or plastic coated fabrics which was an adoption of ISO 2286 : 1972.

ISO 2286:1972 has been cancelled and replaced by ISO 2286-1:1998, ISO 2286-2:1998 and ISO 2286-3:1998.

TERMINOLOGY AND CONVERSIONS

The text of the International Standard has been accepted as suitable for publication, without deviation as a Sri Lanka Standard. However certain terminology and conversions are not identical with those used in Sri Lanka Standards, attention is therefore drawn to the following :

- a) Wherever the words “ International Standard/Publication” appear referring to this standard they should be interpreted as “Sri Lanka Standard”.
- b) The comma has been used throughout as a decimal marker. In Sri Lanka Standards it is the current practice to use the full point at the base as the decimal marker.
- c) Wherever page numbers are quoted, they are ISO page numbers.

INTERNATIONAL
STANDARD

ISO
2286-2

First edition
1998-06-01

**Rubber- or plastics-coated fabrics —
Determination of roll characteristics —**

Part 2:

Methods for determination of total mass per
unit area, mass per unit area of coating and
mass per unit area of substrate

*Supports textiles revêtus de caoutchouc ou de plastique — Détermination
des caractéristiques des rouleaux —*

*Partie 2: Méthodes de détermination de la masse surfacique totale, de la
masse surfacique du revêtement et de la masse surfacique du support*
