Sri Lanka Standards are subject to periodical revision in order to accommodate the progress made by industry. Suggestions for improvement will be recorded and brought to the notice of the Committees to which the revisions are entrusted.

This standard does not purport to include all the necessary provisions of a contract.

**SRI LANKA STANDARD  
SPECIFICATION FOR ASBESTOS-CEMENT PRODUCTS  
PART 1 : FLAT SHEETS  
(SECOND REVISION)**

**FOREWORD**

This standard was approved by the Sectoral Committee on Building and Construction Materials and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2001-11-22.

This part of the standard specifies the flat sheets; Part 2 of this standard specifies the corrugated sheets.

This Standard was first published in 1969 and subsequently revised in 1988. This is the second revision. This revision includes the following:

- a) Amosite (brown asbestos) is not permitted; and
- b) Scale of sampling has been revised.

For the purpose of deciding whether a particular requirement of this standard is complied with, the final value, observed or calculated, expressing the result of a test or an analysis shall be rounded off in accordance with **CS 102**. The number of significant figures to be retained in the rounded off values shall be the same as that of the specified value in this standard.

In the preparation of this standard the assistance derived from the publications of the International Organization for Standardization, the British Standards Institution and the Bureau of Indian Standard are gratefully acknowledged.

**1 SCOPE**

This part of the standard specifies the requirements, methods of sampling and test for asbestos-cement flat sheets intended for both interior and exterior uses in building construction.
