Sri Lanka Standard
SPECIFICATION FOR BICYCLE TYRES AND RIMS
PART 1: TYRE DESIGNATIONS AND DIMENSIONS
(Second Revision)

FOREWORD

This Sri Lanka Standard was approved by the Sectoral Committee on Chemical and Polymer Technology and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2017-12-04.

This Sri Lanka Standard was first published in 1995 and revised in 2006 as the adoption of ISO 5775-1: 1997 Bicycle tyres and rims — Part 1: Tyre designations and dimensions. The International Standard ISO 5775-1: 1997 has been technically revised in 2014. ISO 5775-1 : 2014 has been accepted to adopt as the Second revision to **SLS 1064: Part 1** to be referred in **SLS 224**.

This Standard is identical with ISO 5775-1: 2014 Bicycle tyres and rims — Part 1: Tyre designations and dimensions, published by the International Organization for Standardization (ISO).

TERMINOLOGY AND CONVENTIONS :

The text of the International Standard has been accepted as suitable for publication, without deviation, as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka Standards. Attention is therefore drawn to the following :

- a) Wherever the words ‘International Standard’ appear referring to a particular standard, they should be interpreted as “Sri Lanka Standard”.
- b) The comma has been used throughout as a decimal marker. In Sri Lanka Standards it is the current practice to use the full point at the base as the decimal marker.
- c) Wherever page numbers are quoted, they are ISO page numbers.
