BUREAU OF CEYLON STANDARDS

53, Dharmapala Mawatha,

Colombo 3,

Sri Lanka.

Ceylon Standards are subject to periodical revision in order to accommodate the progress made by industry. Suggestions for improvement will be recorded and brought to the notice of the committees to which the revisions are entrusted.

CONTENTS

	Page
Foreword	7
1. Scope	7
2. Preparation of samples for analysis	7
3. Determination of total fatty matter	8
4. Determination of total alkali	10
5. Determination of total free alkali	10
6. Determination of free caustic alkali	11
6.1 Method 1 (ethanol method)	11
6.2 Method 2 (barium chloride method)	12
7. Determination of titre of fatty acids or total fatty matter	12
8. Determination of unsaponified matter	15
8.1 Determination of free fatty acids	15
8.2 Determination of unsaponified neutral fat and unsaponi- fiable matter	16
8.3 Determination of unsaponifiable matter	17
9. Determination of matter insoluble in ethanol	18
10. Determination of matter insoluble in water	18
11. Determination of chlorides	19
12. Determination of phenols	20
13. Determination of total silica	22
13.1 Method 1 Gravimetric	22
13.2 Method 2 Colorimetric	23
14. Determination of total phosphate	25
14.1 Method 1 Gravimetric	25
14.2 Method 2 Potentiometric	28
15. Determination of rosin	30
15.1 Method 1 Qualitative test	30
15.2 Method 2 Quantitative determination	31
16. Determination of glycerol	32
16.1 Method 1 Using periodic acid	32
16.2 Method 2 Using sodium periodate	35
17. Determination of loss on drying at 100°C-105°C	36
18. Determination of water (distillation method)	37
