TERMINOLOGY AND CONVENTIONS

The text of the International Standard has been accepted as suitable for publication without deviation, as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka standards, attention is therefore drawn to the following;

a) Wherever the words "International standard" appear, referring to this standard, they should be interpreted as "Sri Lanka standard".

b) The comma has been used throughout as a decimal marker. In Sri Lanka standard it is the current practice to use a full point on the base line as the decimal marker.
