Sri Lanka Standard
METHOD FOR THE DETERMINATION OF TEAR STRENGTH OF FLEXIBLE CELLULAR
POLYMERIC MATERIALS
(First Revision)

NATIONAL FOREWORD

This Sri Lanka Standard was approved by the Sectoral Committee on Chemical and Polymer Technology and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2013-10-02.

This Sri Lanka Standard was first published in 2008 based on ISO 8067 : 1989 Flexible cellular polymeric materials - Determination of tear strength. This Sri Lanka Standard Method for the determination of tear strength of flexible cellular polymeric materials is published as the First Revision of SLS 1331 since ISO 8067 has been revised in 2008.

TERMINOLOGY AND CONVENTIONS :

The text of the International Standard has been accepted as suitable for publication, without deviation, as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka Standards , attention is therefore drawn to the following:

- a) Wherever the words ‘International Standard/Publication’ appear referring to this standard they should be interpreted as “Sri Lanka Standard” .
- b) The comma has been used throughout as a decimal marker. In Sri Lanka Standards it is the current practice to use the full point at the base line as the decimal marker.
- c) Wherever page numbers are quoted, they are ISO/IEC page numbers.
