Sri Lanka Standard
MICROGRAPHICS - PLANETARY CAMERA SYSTEMS -
TEST TARGET FOR CHECKING PERFORMANCE

NATIONAL FOREWORD

This standard was approved by the Sectoral Committee on Information Technology on 1996-12-10 and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 1997-05-08.

This Sri Lanka Standard is identical with ISO 10550 : 1994, Micrographics - Planetary Camera Systems -Test target for checking performance, published by the International Organization for Standardization.

Terminology and Conventions

The text of the International standard has been accepted as suitable for publication, without deviation as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka Standards, attention is therefore drawn to the following :

- a) Wherever, the words "International Standard" appears, referring to this standard they should be interpreted as "Sri Lanka Standard".
- b) The Comma has been used throughout as a decimal marker. In Sri Lanka Standards, it is the current practise to use a full point on the baseline as a decimal marker.
