Draft Sri Lanka Standard
SAFETY OF TOYS — PART 2: FLAMMABILITY

NATIONAL FOREWORD

This Sri Lanka Standard was approved by the Sectoral Committee on Chemical and Polymer Technology and was authorized for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on

This Standard is an identical adoption of **ISO 8124-2: 2014** Safety of toys – part 2: Flammability, published by the International Organization for Standardization.

This Standard specifies the categories of flammable materials that are prohibited in all toys, and requirements concerning flammability of certain toys when they are subjected to a minor source of ignition. The test methods described in Clause 5 are used for the purposes of determining the flammability of toys under the particular test conditions specified. This Standard includes general requirements relating to all toys and specific requirements and test methods relating to the toys intended to be worn on the head, toy disguise costumes and toys intended to be worn by a child in play, toys intended to be entered by a child, and soft-filled toys, that could pose a significant risk of injury to a child from the hazards presented by their potential to catch fire.

TERMINOLOGY AND CONVENTIONS

The text of the International Standard has been accepted as suitable for publication without deviation, as a Sri Lanka Standard. However, certain terminology and conventions are not identical with those used in Sri Lanka Standards; attention is therefore drawn to the following.

- a) Wherever the words “International Standard” appear referring to this Standard they should be interpreted as “Sri Lanka Standard”.
- b) Wherever page numbers are quoted they are the page numbers of ISO Standard.
